Pro-Services/Vendor	VMWare

## Architecture

This is the location where you attach or link files that describe the following:  
Network Flow Maps, ports, paths and encryption methods.

## Deployment Procedure

This is the location where you attach or link documentation that explains how the system is deployed. If its a part of another deployment script then explain how the parent script deploys the system including any dependent variables used during this specific deployment.

## Application monitoring

	Application	Function
1		
2		

## Known errors

	Error	Error date	Error report
1			<a href="#">ITSM known errors template</a>
2			
3			

## Troubleshooting

	Step instructions	Enabled	Execution location	Run environments	Run conditions	Documentation
1		<span>YES</span> / <span>NO</span>				
2
